EDUCATION

Manipal Institute Of Technology, Bengaluru

B.Tech in Computer Science and Engineering

CGPA : 8.22

Bengaluru, Karnataka

July 2023 – July 2027

TECHNICAL SKILLS

Languages: Java, JavaScript

Libraries and Frameworks: Spring Boot, Spring Data JPA, Spring Security, JWT, Spring Kafka, Spring AI, gRPC, JUnit, Mockito

Developer Tools: Git, GitHub, Docker, IntelliJ IDEA, VS Code, Eclipse

Databases: MySQL, PostgreSQL, H2

PROJECTS

Patient Management Microservice | *Java, Spring Boot, JPA, JWT, gRPC, Kafka, PostgreSQL, H2, Docker*

- Designed a Java distributed system by modularizing core logic into independent microservices for authentication, patient records, billing and notifications.
- Engineered high-performance service communication using gRPC for low-latency calls and Apache Kafka for resilient, event-driven asynchronous messaging.
- Enforced stateless identity management using JWT, securing data access across the entire microservice ecosystem.

IT Service Ticketing System ([GitHub](#)) | *Java, Spring Boot, Maven, JPA, JWT, MySQL, JUnit, Mockito, Docker*

- Developed a support platform to manage the end-to-end lifecycle of IT support tickets.
- Enforced stateless security and RBAC via Spring Security and JWT, establishing granular access controls for various user roles.
- Optimized data performance by implementing advanced JPA Specification filters and leveraging asynchronous Spring Events to decouple the Email service from core business logic.
- Streamlined DevOps and reliability through Docker/Docker Compose orchestration and achieved high code coverage using JUnit 5 and Mockito for automated unit testing.

Chess2Lichess Browser Extension | *JavaScript, Chrome API, DOM Manipulation*

- Built a Chrome extension to automate PGN extraction from Chess.com, enabling seamless one-click analysis on LiChess without page redirects.
- Implemented robust synchronization using MutationObserver to detect UI changes in Single Page Applications (SPAs), ensuring reliable data capture.
- Designed a native-style UI with error-handling and retry logic, streamlining the user workflow by eliminating manual copy-pasting and page redirects.

COMPETITIVE PROGRAMMING PROFILES

- LeetCode** - [profile](#) (**Knight rank**, Max Rating: **2012**, Top **2%**)
- GeeksForGeeks** - [profile](#) (**4-Star**, Max Rating: **1858**, Top **4.6%**)
- CodeChef** - [profile](#) (**3-Star**, Max Rating: **1620**)
- Codeforces** - [profile](#) (**Pupil**, Max Rating: **1348**)

ACHIEVEMENTS

- Achieved **12th** position among **700** participants in DY Patil Navi Mumbai CodeSummit 2024.
- Achieved **651st** position among **38,000** participants in LeetCode Weekly Contest 484.
- Achieved **3rd Place** in MAHE CodeWars 2025.
- Achieved Global Rank **196** among **3300** participants in Codechef Round 155.
